SPR10DC

Dust cover brush for cable entry

Highlights:

- Slide on installation
- For use with SPR and WPR racks
- Avoids dust and dirt from entering the rack

Product information:

The SPR10DC is a dust cover brush which is meant to be used for covering the cable inlets which are provided in the SPR, WPR & HPR Racks. When the racks are installed in industrial environments, through time dust and dirt will enter the racks through all small gaps and openings. In the longer term, this can have a negative influence on the performance of the equipment which is installed in the racks. The SPR10DC offers a solution for covering the cable inlet holes while still having a great flexibility for running the cables. The cable inlet will be nicely closed while the 40 mm long hairs will bend and nicely fit around the passing cables providing an optimal coverage reducing dust and dirt entering the cabinet. The assembly shall be done by clamping the SPR10DC on the edge of the cable inlet's opening.

Product Features:

Dimensions	12.99 x 2.56 " (W x H)
Weight	0.26 lb
